

IDEATION PHASE
BRAINSTORM AND IDEA PRIORITIZATION

PROJECT NAME	Crude Oil Price Prediction
DOMAIN NAME	COST ANALYSIS
TEAM ID	PNT2022TMID39562
TEAM LEAD	GANESH R - 510619104018
TEAM MEMBERS	ASHWIN P-510619104010 ALLAN WESLEY PRABHU M-510619104007 GOKULAKRISHNAN S-5106191040 GOUTHAM P-5106191040

BRAINSTORM TOP 3 IDEAS

• **Idea 1: It is useful for people with no prior knowledge.**

For using an system or application we need some prior knowledge about it but our system can be used by people with no prior knowledge and easily they can predict and get the results

• **Idea 2: This application allows all types of enterprises to use.**

The application is designed in which it can be used by all kind of enterprises not only for the oil priced production and also for the predetermining the price.

• **Idea 3: Uses of Previously Collected Data.**

With the previously collected data, the user can enter the data, with this data the AI can easily predict the future price of the crude oil & the error correction can be done by the previous data.
